

AUTOMATIC

Five styles of commercial quality drainer pumps for multiple applications. Heavy duty, rugged construction assures a long operating life and economy. Thermal protected motors, rotors supported in oversize ball bearings, and mechanical seals in oil baths. Hydrodynamically balanced impellers complete a serious pump specification.

SSA0512N

SMA 112N

VORTEX

pumps best for grass type material, with big impeller clearances to allow material to pass through without blocking.

SFA 112AN

HIGH HEAD

A 'clean' water pump with a head to 16M and flows to 340LPM. Ideal for water containing dirt, etc. In suspension and small solids.

STA 112N

SHREDDER

pump has a cutter blade type impeller to handle light rubbish.

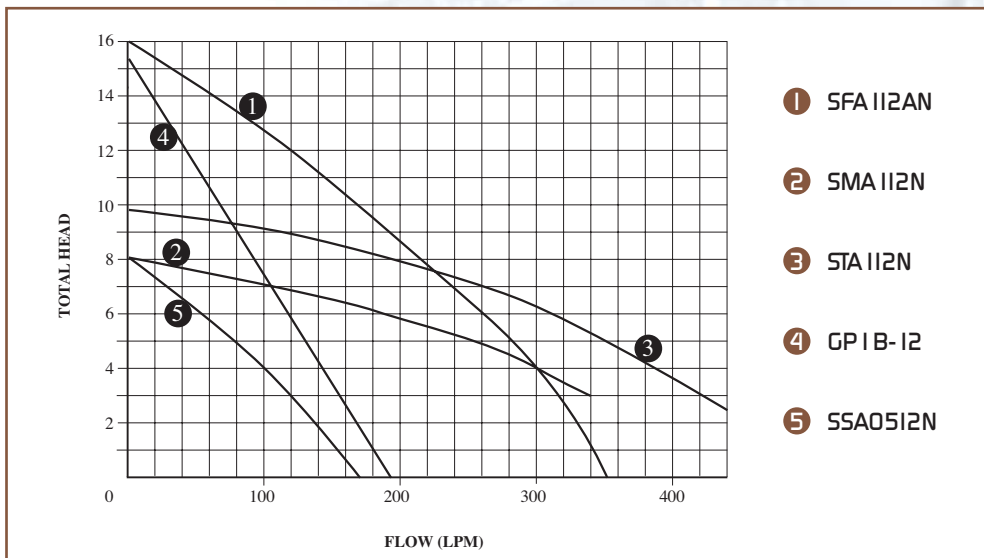

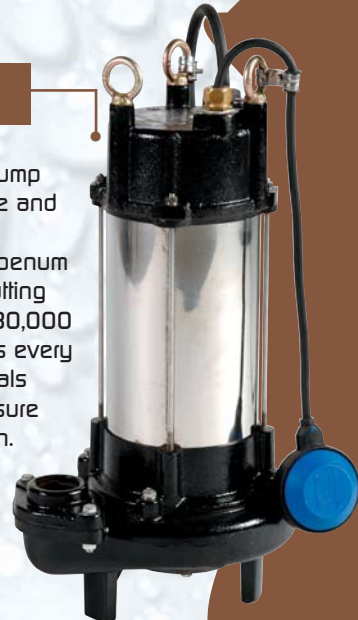

(STA/SMA are fitted with silicon/carbide seals.)

GP1B-12

GRINDER

1.1 kW fixed blade and rotating cutter of chromium/molybdenum alloy steel .27 cutting edges provides 80,000 shredding actions every minute. Triplex seals and bearings ensure long life operation.
