AVAILABLE FROM:

PUMP BASE

Cast Stainless incorporating an effective suction strainer.

STAGING

Impeller in noryl and diffuser in polycarbonate are located inside a stainless stage bowl. The different materials reduce lock up in the event of a dry run situation.

SHAFT BEARINGS

Stainless sleeve running inside a urethane bush.

SHAFT ASSEMBLY

6 point drive, hexagon, with press-fit coupling.

DISCHARGE HEAD

Cast stainless with inbuilt, high flow, check valve.

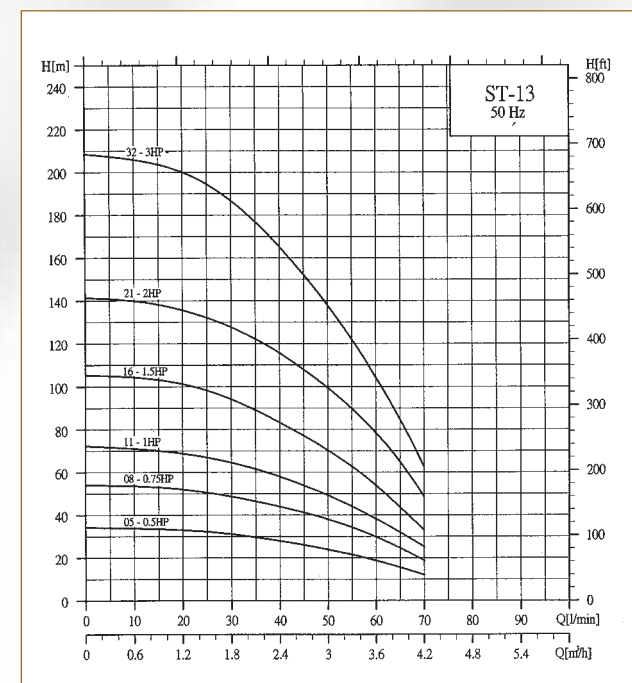

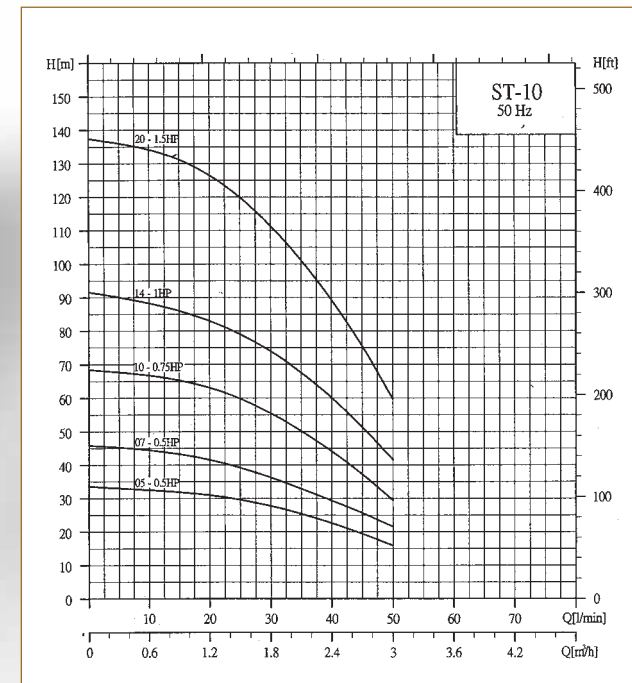

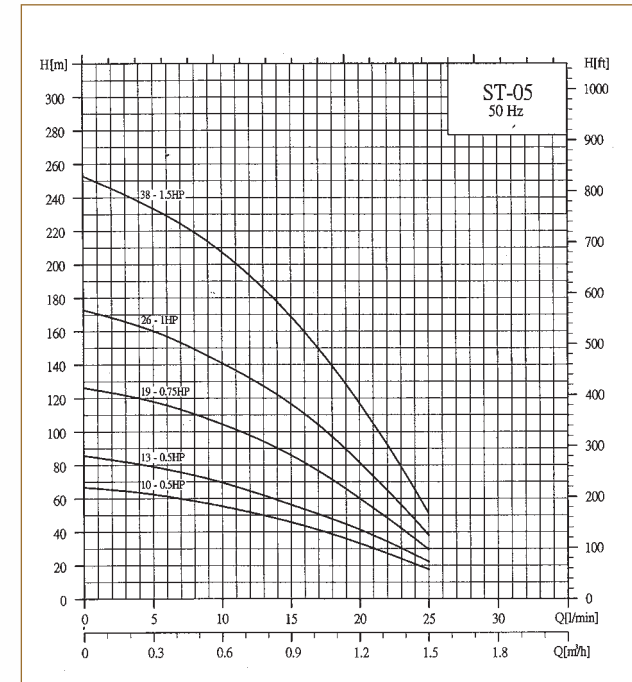

SHELL

In 1.5mm solid stainless polished to improve resistance to corrosion.

SUBBIE-MATE

4" STAINLESS BORE HOLE PUMPS

inside view
