EXPLANATORY NOTES

CONTROLS

B	=	Bare pump unit with 3 pin plug and lead
P	=	Pump with pressure switch, gauge, delivery tee, check valve, etc
PC/MPC	=	Electronic controller kit

CONTROLS

'P' units include a pressure switch and pressure gauge. 'P' units are designed to be used with an attached 3L, 8L, 18L or 24L pressure tank, or a free standing pressure tank.

'PC' and 'MPC' is an electronic controller that will stop the pump within 7 seconds from turning off the water flow, or if the incoming water supply is interrupted. This controller also automatically monitors flows down to under 1 L.P.M. to eliminate cycling. Pumps incorporating the PC or MPC controller should always be plumbed in as close as possible to the premises being supplied.

KWICK KITS

A range of Kwick Kits are available to easily convert the pump from plug in only (bare) pumps to pumps fitted with either pressure switches or electronic controllers. See Page 15 for a separate list of kits.

GENERAL INFORMATION

All units are 240 volt, single phase TEFC motors with thermal overloads. All pressure systems include a brass suction check valve (where necessary). On suction lift installations an appropriate foot valve must be used.

These pumps are designed to pump clean water designated 'potable' (suitable for human consumption) with nominal power supply of 240 volts, single phase, 50 cycle. They are for domestic / light agricultural use only, and not recommended for heavy duty industrial applications which may involve arduous operating conditions.

MULTIMATE

STAINLESS STEEL PRESSURE SYSTEMS - SILENT RUNNING

MODEL CSS2 - CSS4 - All stainless steel pumps.

A superior quality pump with flows to 130LPM and pressures to 55 metres. In all high grade stainless steel where in contact with pumped liquid. Ideally suited for automatic pressure operation in small to large homes, with excess capacity for garden supply. Offers all the benefits in a small, compact pump.

MODEL P7-250 – P9V-300 - Multiple stage pumps, quiet in operation and very efficient. Stainless steel bodies, heads to 70M and flows to 180LPM. Multi-stage Pressure Systems, Stainless Steel Body, Stainless/Noryl internals

HOUSEMATE / FARMMATE

HIGH PRESSURE SYSTEMS

MODEL CTJ 100 - 120 - Typical 'Jet Pumps' with heads to 54M and flows to 70LPM. Ideal for medium to large dwellings as pressure systems. They will self prime (can handle some air on the suction side) which can be of benefit in many instances. Like all shallow well Jet Pumps, on suction lifts performance declines with depth of water; at lifts of 6M, approx. 50% losses have occurred. For this reason, they are most suited to flooded suctions (water tanks etc.) or shallow suction lifts.

MODEL CTJ 150 - 300 - Very high pressure, Jet assisted self-priming. Pressures to 67M and flows to 120LPM. Ideal for long distance pumping, wash-down, with a flat performance curve. Also as a pressure system for large properties. As a Jet Pump, the same restrictions on the suction lifts apply as the Housemate Jet Pumps. External Jet/Venturi operation. Dual Noryl Impellers, Cast Iron Body. Ideal for use with large Wellmate Pressure Tanks.

HOUSEMATE / NEO

HIGH PRESSURE SYSTEMS

MODEL TT -

These peripheral turbine pumps are ideally suited for frequent use pumping clean water from collection tanks. They produce high pressure and economical operation, with heads to 30M and flows to 35LPM. Rugged metal casings, stainless steel shafts and non corrosive internals make this a solid, small to medium size house pump. The brass stamped turbine can handle high water temperatures and is great for pressure boosting.

MODEL JP -

Typical 'Jet Pumps' with heads to 45M and flows to 60LPM. Ideal for medium to large dwellings as pressure systems. They will self prime (can handle some air on the suction side). They are most suited to flooded suctions (water tanks etc.) or shallow suction lifts.

MODEL JSL -

Similar to Housemate series but with a stainless steel casing. Ideal where water being pumped is brackish or slightly aggressive. Jet/Venturi Operation, Stainless Steel Body, Noryl Internals, Self Priming, Jet Pumps. Heads to 38m and flows to 60LPM.

WATERGATE

TANK TO MAINS CONTROLLERS

A selection of 6 alternative rain/mains water switching devices from domestic house use in a laundry-toilet requirement. to total house supply, to commercial applications - Watergate has a model suited to your needs.

MODEL	DESCRIPTION	LIST PRICE	incl. GST
WG6A	Domestic switching device: 600 Watt Stainless body pump with electronic controller max 35M head / 50LPM flow Wall mounted hydraulic switchover (No float switch required, not suitable for below ground tanks)	\$1070.00	\$1177.00
WG6AC	As above, but all enclosed in quality pump box	\$1320.00	\$1452.00
WGABS	Domestic Switching device comprising: 600 watt stainless body pump with electronic controller max 35M head / 50LPM flow with 12V operated electric changeover controller incorporating in-tank float switch Enclosed in quality pump box	\$1320.00	\$1452.00
WGSB	Domestic switching device comprising: 750 watt stainless steel multi stage submersible pump in tank max 48M head / 65LPM flow wall mounted electronic controller and hydraulic switchover (No float switch required in tank)	\$1180.00	\$1298.00
WG3A	Commercial switching device comprising: High flow (80LPM Plus, high pressure (1000kpa) componentry enclosed in weatherproof enclosure for wall mounting includes in-tank float switch suitable for pumps up to 1100w	\$1200.00	\$1320.00
WG3AB	As above, but enclosed in quality pump box with 800 watt pump unit max 38M head / 60LPM flow	\$1600.00	\$1760.00
WG3 Series	also available to suit up to 50mm pipe flows, for large commercial / industrial applications	POA	POA

RANCHMATE

HIGH CAPACITY PRESSURE SYSTEMS

MODEL CTBJ - Big flow pumps with pressure heads up to 47M and flows to 222LPM .
 Suitable for large watering sprinkler applications or water transfers. Centrifugal Type, dual Impellers, Noryl Internals, Cast Iron Body.

RANGEMATE

MEDIUM CAPACITY PRESSURE SYSTEMS

MODEL CTJ2 - Flows to 180LPM and maximum head of 60M.

Single brass impeller, cast iron diffuser, self priming jet pumps, combining substantial flow with very usable pressures. Particularly suited to applications where self priming benefits are important and the application demands a flexible operating performance.

WATERMATE

CENTRIFUGAL PUMP SYSTEMS

MODEL CTM 50 - Excellent small transfer pump for tank filling. Pressures to 20m and flows to 95LPM Centrifugal Type, Cast Iron Body.

MODEL CTM 100 to 200 - These larger sizes are excellent pressure system units on suction lifts, as performance is only effected marginally on water depths to 8M. Pressures to 52M and flows 120LPM.

MODEL SDK - Open impeller, ideal for grey water/septic tank water transfer. Head to 14M flow to 160LPM

MODEL SCM-SPM - These larger sizes are excellent pressure system units on suction lifts, as performance is only efficiently maintained on water depths to 8M. Pressures to 35M and flows 200LPM.

MODEL CTC - Open impeller, ideal for grey water/septic tank water transfer. Head to 18M flow to 300LPM.

MODEL SSM - All stainless steel centrifugal, heads to 28M, flow to 150LPM, for corrosive liquids.

MODEL SPL1-300 - ideal for dairy washdown. Single and three phase. Heads to 32M and flows to 440LPM.

BOREMATE

DEEP WELL JET PUMPS

MODEL CTA - 100 - 200 - 300 - Deep well Jet Pumps that can lift water from depths of 46M. They are not high flow pumps but provide excellent discharge pressures. Flows to 60LPM, pressures to 59M. Centrifugal Type, with Deep Well Injector, Noryl Internals, Cast Iron Body, add your choice of injector kit, only needing the suction and return pipes (two pipes).

POOLMATE

SWIMMING POOL PUMPS

MODEL FCP550S - 750S - 1100S2 - 1500S with in-built leaf strainer

Quiet Operation

Pump Body: Glass filled Polypropylene
 Impeller: Glass filled Noryl
 Shaft: Stainless Steel AIS420 with insulated impeller sleeve
 Mech. Seal: Graphite and Aluminum
 Seal mounting: Glass filled Luranyl
 Motor: Windings impregnated with epoxy resin - Class F insulation.
 Asynchronous, 2 poles
 Continuous Operation
 IP 55 Protection
 Built-in thermal protection
 Motor housing in aluminium L-2521

MODEL	KW	DESCRIPTION	INLET	OUTLET	List Price	incl. GST
FCP550S	0.55	.75 HP Pool Pump c/w Pre Filter	50mm	50mm	\$375.00	\$412.50
FCP750S	0.75	1 HP Pool Pump c/w Pre Filter	50mm	50mm	\$429.00	\$471.90
FCP1100S2	1.1	1.5 HP Pool Pump c/w Pre Filter	63mm	63mm	\$495.00	\$544.50
FCP1500S	1.5	2 HP Pool Pump c/w Pre Filter	63mm	63mm	\$778.00	\$855.80
Note: SWP250	0.25	Not for swimming pool use .33HP Transfer pump	40mm	40mm	\$450.00	\$495.00

KWICK KITS

CONVERSION KITS FOR ABOVE GROUND PUMPS

All pumps can be supplied with or without control options. This range of Kwick Kits easily converts the pumps from plug in only (bare) pumps to pumps fitted with either pressure switches or electronic controllers.

CODE	TO SUIT PUMP	LIST PRICE	incl. GST
PLUG IN ONLY UNITS			
KIT-B1	All Bare Pumps 1.1kw (1.5HP) and under -except CTA series	\$10.00	\$11.00
KIT-B2	All Bare pumps >1.5kw (2.0hp) - except CTA and SPM200	\$12.00	\$13.20
KIT-B3	CTA100, CTA150 Incorporates necessary discharge fittings	\$37.00	\$40.70
KIT-B4	CTA200, CTA300 Incorporates necessary discharge fittings	\$42.00	\$46.20
PRESSURE SWITCH KITS

BOREHOLE SUBMERSIBLES

EXPLANATORY NOTES

MOTOR EXAMPLES:

ST-1014 F = 2 Wire Franklin Motor and Splice Kit
ST-1014 M = 3 Wire Franklin Motor, Control Box and Splice Kit
ST-1014 T = 3 Phase Franklin Motor and Splice Kit
NOTE: Combo pricing includes pump and the above

2 wire 240v do not require a control box
3 wire 240v require a control box (Included in the combo pricing)
3 wire 415v require a motor starter

- All single phase motors have thermal trip protection in the control box except 2 wire which have on-winding thermal protection.
- Three phase motors require a motor starter with voltage surge protection and quick-trip circuit breaker. Warranty void unless fitted.
- Motors that are ordered separately are supplied with a motor lead but splice kits must be ordered separately.

PUMP ENDS:

ST = Stainless external construction, in-built check valve
ST10 = Nominal Flow in US GPM
ST-1020 = No of stages

- Minimum bore size for 100 mm (4") pumps / motors is 104 mm.
- Minimum bore size for 147 mm (6") pumps / motors is 150 mm.
- Pump units may operate from vertical to horizontal installations.
- Refer to state distributor for horizontal use.
- Pumps are designed for the pumping of water intended for domestic and agricultural use.

WELLMATE

FIBREGLASS PRESSURE VESSELS

The long lasting pressure tanks that offer real benefits for dealers and owners. These tanks contain no steel, consequently they can't corrode. Because they contain no steel, there is no paint to require repair, or rust to conceal. The unique aircell won't abrade against any metal and contains air, not water! They are light weight, easier to handle and quick to install. Only NSF / FDA materials are used to ensure pure, safe water with environmentally safe componentry. Fully repairable with replacement parts. 5 YEARS WARRANTY FROM DATE OF PURCHASE.

AQUAFOS

PRESSURE VESSELS

Aquafos pressure tanks are constructed with a polypropylene liner and high grade butyl diaphragm.

- Features:
- 10 bar (150psi) pressure rating
 - NSF standard 61, IAMPO R&T UPC approved
 - Polypropylene liner ensures long durability
 - Butyl diaphragm assures long life and safety
 - Highly rust resistant durable baked epoxy coating finish
 - Cast stainless steel water connection
 - Leak free, o-ring sealed air valve cap
 - 100% pressure tested
 - No maintenance

SUMPMATE / NEO-SUB SHALLOW LIFT DRAINER PUMPS

PLASTIC DRAINERS

Submersible drainer pumps with rugged plastic casing used with clean water, contaminated water and water containing small solids. All pumps come with a stainless shaft and mechanical seal in construction running against a ceramic face. Plastic Body and light weight design for medium / continuous duty. Unique 'Epoxy Cable and Sealing Base' All ball bearing construction. Float switch operation.

20DOMO - Multistage pump motor combination for installation in rainwater collection points.

BLASTMATE
ENGINE DRIVE PRESSURE WASHERS

3 models of engine drive pressure washers fitted with genuine HONDA engines
The highest grade triplex pump with ceramic pistons and brass manifold

- FEATURES:
- 5 quick connect nozzles
 - Professional trigger gun with safety lock
 - 9m heavy duty hose with quick connections
 - Reinforced suction hose with 1/2" fitting
 - Clear detergent hose with strainer
 - Heavy duty frame with fold down handles
 - 2 year warranty
 - Fitted standard with thermal relief valve which allows unit to run for up to 1 hour on standby
