

Pump Accessories

Polyslab Pump Covers

Polyslab Pump Covers are the lightweight, recycled, eco-friendly, Australian made, wholly Australian owned, UV stabilised, durable and impact resistant solution you have been looking for. Each Pump Cover includes a matching Polyslab base and is easy to fabricate to your specific needs with simple cut and snap pipe entry points. The base will not hold moisture, assisting in the prevention of “rusty feet” attacking your pumps integrity.

Features

- Lightweight - cover = 2.7kgs, Base = 1.6kgs
- Easy to install.
- UV stabilised (8-10 years) & water-resistant.
- Polymer design ensures the pump cover won't corrode or grow mouldy like unsightly concrete bases.
- Multiple footing points to secure cover to base.
- Emergency water duct in case of pipe failure.
- Water resistant cooling vents.
- Easy to follow cut & snap entry points.

Applications

Domestic and commercial applications in industries such as:

- Mining
- Plumbing
- Irrigation
- Construction
- HVAC (Heating Ventilation Air-Con.)
- Electrical

Polyslab Pump Covers are also well suited for use with submersible bore pumps (simply cut a hole in the base and house sensitive electrical components under the cover).
